Credenza Rectangular

Timeless design.
Stunning use of materials.
A credenza that is far
from regular.

Designed to perfectly complement Hidde's collections of small items, the Credenza Rectangular also works well on its own, taking on a leading role in any contemporary living area.

The interiors feature a wide range of optional accessories, including led lighting with dimmers on the sides, and a glass shelf made of tempered glass with a tinted grey effect.

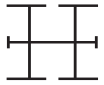

The detail that differentiates this spectacular credenza are the two sleek and elegant metal feet due to which we

have the fancy that the whole element is floating gently in the air.

Central part of credenza is made from Croatian oak wood from Slavonia Forest, while the fronts can be chosen from either transparent flute glass or woven metal mesh in fishbone pattern that can also be enriched with a print containing an original pattern made by the artist Elisabeth Ehmann. The top of credenza can be chosen between unique stone stops, or solid Croatian oak. This unique and outstanding Credenza is available in one size only.
