

A functional art piece.
And a timeless classic.

139 Onehundredthirtynine

Signature Wardrobe

Standing on two elegant and sleek metal legs, with same metal trim continues through the floor and runs around the sides of closet.

The Hidde Signature Wardrobe is made mainly out of wood. Hidde offers one type of thoughtfully designed wardrobe, creating a “piece of mind” state when placed in a room. Behind the simplicity of design, engineering part hides all the technologically developed solutions.

The setup of the unit combines a main closet with separated interior, a side chest of drawers

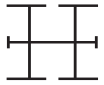

and a mirror unit.

The door frame is made of solid wood, while the fronts can be chosen from either transparent flute glass or with woven metal mesh in fishbone pattern, with matte bronze effect that can also be enriched with a print containing an original pattern made by the artist Elisabeth Ehmann. Closet interior is separated with vertical wooden panel on two sides. One is hanging and one is combination of hanging with set of glass shelves.

Hidde Signature Wardrobe is available in only one size.
